

2014 Drought - Summary of EF Actions and Operational Area Concerns – 02/01/2014 (No Change)

EMERGENCY FUNCTIONS:

EF 03

Department of Water Resources (DWR):

* On December 13, DWR activated the Drought Management Operations Center (DMOC) under SEMS and the DWR Drought Management Team to support the Drought Task Force and the State Operations Center (SOC) objectives.

* DWR has accelerated identification of specialized resources to address specific objectives. Management teams have been established for Water Use Efficiency and Water Transfers. New management teams include Groundwater, Local Assistance, and Diversion Oversight (to support resource needs of SWRCB-Water Rights). In addition, a Delta Barriers Team is in the process of forming with the objective of providing modeling, construction and environmental permitting for any new barriers that may be determined to be necessary to protect beneficial uses.

* DWR has enhanced the drought website for the public ([www.water.ca.gov/water conditions](http://www.water.ca.gov/water-conditions)) with further emphasis on water conservation as well as other topics. Links to a larger variety of conservation websites are available (Save Our Water, 20% by 2020, and Water Use Efficiency) as well as links to other state agency drought websites (Cal OES, CDPH, USDA).

* Based on current forecast - water supply resources (surface and ground water) will be further degraded in the coming weeks and months. Limited supply will have local, regional and statewide impacts.

EF 06

* The Emergency Food and Assistance Program (EFAP) has been identified to provide the oversight of the delivery of the emergency food needs for the State proclaimed drought counties.

EF 08

* California Department of Health (CDPH) is conducting a comprehensive update of the impact of the drought on at risk water systems. The data collected from water systems is included in the Situation Report under the Operations Drinking Water section. Information will be updated weekly.

EF 10

State Water Resources Control Board (SWRCB)

* Met with DWR and are prepared to process water transfers filed with the SWRCB within 60 days.

* Met with DWR and U.S. Bureau of Reclamation regarding Consolidated Place of Use and are prepared to process once received.

* Met with DWR, U.S. Bureau of Reclamation and fishery agencies regarding Temporary Urgency Change Petition for rebalancing Delta requirements. Also are evaluating actual curtailment of water right holders in various watersheds throughout the state.

EF 11

* California Department of Food and Agriculture (CDFA) Senior Activation Team continues to meet weekly to discuss Departmental efforts to support the statewide drought. Key staffs are engaged in research, outreach, and collaborative efforts with state, local and federal stakeholders/industry to ensure that all information about the various assistance programs and services is discovered and shared as appropriate.

* The CDFA one-stop website (www.cdfa.ca.gov/drought) will continue to be updated and provide timely updates on the drought; it will connect farmers to state and federal programs and it will share assistance programs and services for farm workers. Information on the webpage will be translated to Spanish; the translation target date is 2/3/14.

EF 12

Department of Fish and Wildlife (DFW)

* Evaluate and manage the changing impacts of drought on threatened and endangered species and species of special concern, and develop contingency plans for state Wildlife Areas and Ecological Reserves to manage reduced water resources in the public interest.

* DFW has begun to evaluate water supply, use, and future actions at its hatchery facilities to increase water conservation, maximize fish survival, and strategize how, when, and where to release fish stock. The hatchery system is also being evaluated for best and potential fish conservation facilities, to hold the most at-risk fish populations and preserve native genetic stock and diversity if necessary.

CAL FIRE

Based on the current and expected weather conditions and fire activity, CAL FIRE has retained staffing on 39 engines in the southern part of the State that would normally not be staffed at this time of the year. In the northern part of the State, CAL FIRE has staffed 25 engines throughout the region that would normally not be staffed at this time of the year. Additionally, CAL FIRE has retained aviation resources at five air attack bases that would normally be closed this time of year.

OPERATIONAL AREAS:

Calaveras County:

* The District is enforcing voluntarily conservation 20% reduction at this time. The District is providing public awareness through handouts, website updates, and requesting the voluntary measures at this time. Currently in State 2 - Warning voluntary measures

Kings County:

* If shortage continues, Avenal may be requesting assistance but only after a formal proclamation by City Council, implementing further reductions.

Placer County:

* Placer County Water Agency (PCWA) anticipates they will declare a Water Shortage Emergency at their February 6th Board meeting. Water Agencies are communicating with their customers encouraging voluntary 20 percent reductions in use. Water agencies are discussing plans and strategies as the drought continues. Because there is no surplus water this year, PCWA will not be able to provide water to rice farmers. This year, rice farmers will be relying on

groundwater to support their crops. Because of this, 75% of the rice farmers in the county have decided not to plant this year.

Plumas County:

* Plumas Co Board of Supervisors are scheduled to appoint a Drought Task Force at the 02/04/14 regular meeting

Sacramento County:

* Stage 2 – 20% water reduction requested from public.

San Joaquin County:

* Reported current issues with cattle ranchers supplementing feed and seeing stock ponds drying up. Existing crops are requiring irrigation normally needed in warmer months as well as the need for possible crop rotations.

Tuolumne County:

* Tuolumne Utilities District has moved into Phase III, mandatory water conservation. Customers must reduce water usage by 50%.

Santa Barbara County:

* Established a 8 member Drought Task Force in line with the state

Humboldt County:

* Enacted Stage 1 (of 5) voluntary conservation measures

Marin County:

* MMWD has activated the district's water shortage contingency plan calling for 25% voluntary usage reduction. Department of Agriculture reporting lack of feed and reduction in ranching herds.

Mendocino County:

* Willits, Pine Mt., and Brooktrails all have less than 100 days of supply. Are currently Working with public health to come up with solutions. Other districts have restrictions. Lake Mendocino has limited supply and will affect agriculture.

* City of Willits (Stage 5 of 5) and Brooktrails Township (20% reduction) have mandated water reduction.

* Working with City of Willits, Brooktrails, and Redwood Valley water district to find resources to meet the water shortage needs. These three areas have been identified as the most critical need within the County of Mendocino. OES has been working with CDPH who has been out doing site visits to water districts in Mendocino County (Mission 2014-Coastal-2015).

Information for the three most critical areas:

* Willits: population served 8,062, investigating the use of an old agricultural well near waste water treatment plant and separate well which has arsenic 12 times the MCL. Discussions are currently ongoing about treatment options for these wells.

* Brooktrails: Population served 3,800, plan rationing and possible inter tie with Willits or drill

additional wells. The wells will likely have impacts with Fish and Game, any assistance with their agency would be helpful.

- * Redwood Valley CWD, population served 3,969, planning multiple step approach including pumping into intake caisson and enhancing an inter tie with adjacent water systems.

- * OES and CDPH have been in contact with all three systems. CDPH has performed field visits to each system. CDPH is visiting the Wilits area again on 1/30/14 to discuss alternatives and then if possible will be visiting with the Mendocino Task Force after for a summary.

- * The Mendocino County Board of Supervisors has assembled an AD HOC committee who is looking at water shortages.

- * The Mendocino County Board of Supervisors has renewed their declaration of an emergency.

San Benito County:

- * Board of Supervisors meeting will discuss a proclamation of Water Shortage Emergency and Implementing the Districts Water Shortage Contingency Plans.

Sonoma County:

- * City of Healdsburg enacted mandatory conservation at Stage 2 (of 3). These measures are intended to cut usage by 20%. City of Cloverdale passed mandatory use reductions of 25%. The small community of Sea Ranch on the coast has instituted voluntary conservation measures. Sonoma County Water Agency has launched a voluntary conservation campaign and the City of Petaluma considers conservation efforts if conditions don't change.
